

## Автостабилизатор M2 DC12-12V 14W

### Features

- Output current: < 1.2A
- Output Voltage: 12V ± 5%
- Output Power up to 14W
- Small package
- UL-94 non-conducted case

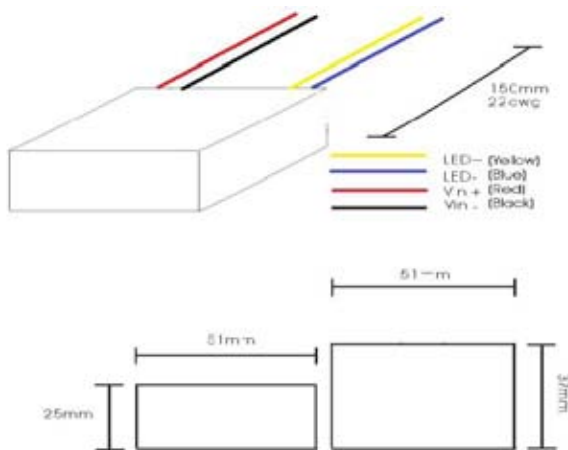

### Description

The is a smaller driver solution for battery regulation. It's small size makes it easy to use in a wide variety of Car & Solar applications with a wide range voltage input.

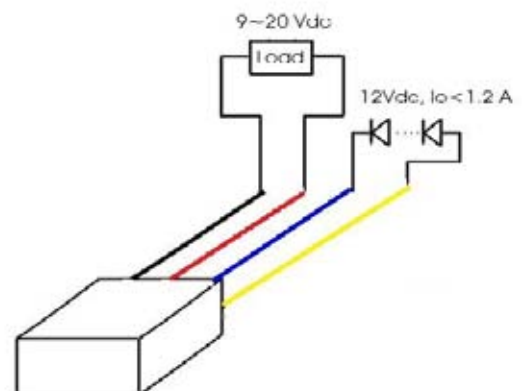

### Applications

- Car applications
- Solar application
- Battery application

### Dimension

### Circuit

Parameters	Symbol	Value	Unit
Input Voltage	Vin	9-20	VDC
Output Voltage	Vo	12	VDC
Constant current	Io	<1.2	A
Output Power (Maximum)	Wo (max)	14.0	W
Operation temp (°C)	* Toper	-20 ~ 60°C	

All components is -20 -105 °C
