# Ultra High Dynamic Range **Monolithic Amplifier**

# **PHA-1+**

#### 0.05 to 6 GHz **50**Ω

## **The Big Deal**

- Ultra High IP3
- Broadband High Dynamic Range without external Matching Components
- May be used as a replacement to WJ AH1<sup>a,b</sup>

### **Product Overview**

PHA-1+ (RoHS compliant) is an advanced wideband amplifier fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the PHA-1+, unlike competitive models, has good input and output return loss over a broad frequency range without the need for external matching components and has demonstrated excellent reliability. Lead finish is SnAgNi. It has repeatable performance from lot to lot and is enclosed in a SOT-89 package for very good thermal performance.

### **Key Features**

| Feature  | Advantages  |  |  |  |
|--|---|--|--|--|
| Broad Band: 0.05 to 6.0 GHz  | Broadband covering primary wireless communications bands:<br>Cellular, PCS, LTE, WiMAX  |  |  |  |
| Extremely High IP3<br>Versus DC power Consumption<br>42 dBm typical at 2 GHz | The PHA-1+ matches industry leading IP3 performance relative to device size and pow-<br>er consumption. The combination of the design and E-PHEMT Structure provides en-<br>hanced linearity over a broad frequency range as evidence in the IP3 being typically 20<br>dB above the P 1dB point. This feature makes this amplifier ideal for use in:<br>• Driver amplifiers for complex waveform up converter paths<br>• Drivers in linearized transmit systems<br>• Secondary amplifiers in ultra High Dynamic range receivers |  |  |  |
| No External Matching Components<br>Required                                  | Unlike competing products, Mini-Circuits PHA-1+ provides Input and Output Return Loss of 14-21 dB up to 4 GHz without the need for any external matching components   |  |  |  |
| Low Noise Figure: 2.3dB typ. up to 4 GHz<br>3.5dB typ. up to 6 GHz           | A unique feature of the PHA-1+ which separates this design from all competitors is the low noise figure performance in combination with the high dynamic range.   |  |  |  |

Notes:

a. Suitability for model replacement within a particular system must be determined by and is solely the responsibility of the customer based on, among other things, electrical performance criteria, stimulus conditions, application, compatibility with other components and environmental conditions and stresses.

b. The WJ AH1 part number is used for identification and comparison purposes only

Notes

# Ultra High Dynamic Range **Monolithic Amplifier**

# 0.05-6 GHz

#### **Product Features**

- High IP3, 42 dBm typ. at 2 GHz, 5V
- Gain, 13.5 dB typ. at 2 GHz, 5V
- High Pout, P1dB 22 dBm typ. at 2 GHz, 5V
- Low noise figure, 2.2 dB @2 GHz, 5V
- Usable to 4.0V
- No external matching components required
- May be used as replacement for WJ AH1<sup>a,b</sup>

### **Typical Applications**

- Base station infrastructure
- Portable Wireless
- CATV & DBS
- MMDS & Wireless LAN
- LTE

#### **General Description**

PHA-1+ (RoHS compliant) is an advanced wideband amplifier fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the PHA-1+ has good input and output return loss over a broad frequency range without the need for external matching components. Lead finish is SnAqNi. It has repeatable performance from lot to lot and is enclosed in a SOT-89 package for very good thermal performance.

#### simplified schematic and pin description

| Function         | Pin Number | Description   |  |
|------------------|------------|---|--|
| RF IN            | 1          | RF input pin. This pin requires the use of an external DC blocking capacitor chosen for the frequency of operation.   |  |
| RF-OUT and DC-IN | 3          | RF output and bias pin. DC voltage is present on this pin; therefore a DC blocking capacitor is necessary for proper operation. An RF choke is needed to feed DC bias without loss of RF signal due to the bias connection, as shown in "Recommended Application Circuit", Fig. 2 |  |
| GND              | 2,4        | Connections to ground. Use via holes as shown in "Suggested Layout for PCB Design" to reduce ground path inductance for best performance.   |  |

Notes

a. Suitability for model replacement within a particular system must be determined by and is solely the responsibility of the customer based on, among other things, electrical performance criteria, stimulus conditions, application, compatibility with other components and environmental conditions and stresses

- b. The WJ AH1 part number is used for identification and comparison purposes only.

See Characterization Test Circuit (Fig. 1)  $^{(2)}$  Measured on Mini-Circuits test fixture 90-6-20-26 characterization Circuit (Fig.1), except replace TB-313 with 90-6-20-26  $^{(3)}$  (Current at 85°C — Current at -45°C)/130

### **Absolute Maximum Ratings**

| Parameter                           | Ratings        |  |  |
|-------------------------------------|----------------|--|--|
| Operating Temperature (ground lead) | -40°C to 85°C  |  |  |
| Storage Temperature                 | -65°C to 150°C |  |  |
| Operating Current at 5V             | 210 mA         |  |  |
| Power Dissipation                   | 1 W            |  |  |
| Input Power (CW)                    | 24 dBm         |  |  |
| DC Voltage on Pin 3                 | 6 V            |  |  |

Note:

Permanent damage may occur if any of these limits are exceeded.

Electrical maximum ratings are not intended for continuous normal operation.

Notes

| Environmental Ratings  | ENV08T1   |  |  |  |

#### ESD Rating

Human Body Model (HBM): Class 1A (250 to <500V) in accordance with ANSI/ESD STM 5.1 - 2001

Machine Model (MM): Class M1 (>25V) in accordance with ANSI/ESD STM5.2-1999

#### MSL Rating

Moisture Sensitivity: MSL1 in accordance with IPC/JEDEC J-STD-020D

**MSL Test Flow Chart** 

Notes
A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
C. The parts covered by this specification document are subject to Mini-Circuit's standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and beefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuit's website at www.minicircuits.com/MCLStore/terms.jsp
