

This product is widely used in radio retrofit, mobile phones Brush, XBOX360 Brush, GPS, automotive testing, DVD brush machine, hard disk repair, set-top box upgrade.

It can be used for programming the microcontroller type:

STC microcontroller

STM32 microcontroller

NXP microcontroller

Renesas MCU

NEC MCU

Communications chips: Domestic MAX3232

Operating voltage: 3.3V-5.5V

Interface: TX RX VCC GND
