

Dimension:23mmx20mmx20mm

Chip: LM393, on the radio infrared head

Working voltage: DC 5 V

Features

1, It has a signal output instructions.

2Single-channel output.

3, Output valid signal is low.

4, Sensitivity is not adjustable.

5It can be used for workpiece count, the motor speed. . . .

6Circuit board output switch!
